Evidence from the Vancouver 1996 International AIDS Society conference leads to the introduction of HAART as the therapeutic strategy for HIV by the BC-CfE.

The first people with AIDS symptoms show up at St. Paul's Hospital.

The BC Centre for Excellence in HIV/AIDS is founded.

The Immunodeficiency Clinic (IDC) is established.

The concept of Treatment as Prevention is first introduced by Dr. Montaner at the Toronto 2006 International AIDS Society conference.
